RX 60-60/80 Electric Forklift Truck

Making light work of things

This specification sheet, which conforms to VDI guideline 2198, provides the technical values for the standard equipment only.
Different tyres, other masts, the use of accessories, etc., may result in other values.

Detailed Photos

Easy handling of heavy loads in tight spaces

Flexible indoor and outdoor use

Non-slip steps visible from the top for safe access and exit

Manoeuvrable and stable high pendulum axle

Fast battery change with ECU 30 high lift truck

High availability thanks to fast battery changeover

Easily accessible maintenance positions

PowerPlusLife battery with particularly long service life

RX 60-60/80 Electric Forklift Truck

Making light work of things

Compact design and excellent mobility

The powerful electrical drive unit has very low environmental impact and a high handling rate

Excellent visibility due to driver's cab being set to one side and high seat position

Optional sprint mode and cooled PowerPlusLife battery for top driving speed of 20 km/h

The electric forklifts in the RX 60-60/80 series are emission-free powerhouses. They have particularly high performance, as well as being extremely compact and manoeuvrable. The flagship model, the RX 60-80/900, can lift up to eight tonnes in working aisle widths of just 4,999 mm at a load centre of 900 mm. These strong forklifts are emission-free both inside and out, as well as being a highly efficient means of transport – even in damp and dusty environments. The sensitive control and the maximum speed of up to 17 km/h ensure

a high handling rate. Besides the sensitive controls the maximum driving speed of up to 17 km/h in the standard version and 20 km/h in the optional sprint mode and with the PowerPlusLife battery ensures high turnover performance.

Whether for freight carriers or manufacturing sectors, handling heavy loads or fast loading and unloading of lorries, its high performance, precise hydraulics and well-conceived forklift ergonomics make the strongest RX-60 model an unbeatable warehouse assistant.

Extensive Equipment

Power

- Nominal load capacity of up to eight tonnes at a load centre of 900 mm
- Maintenance-free 80 V three-phase drive
- Effective goods materials handling due to high driving speed of up to 17 km/h or 20 km/h with the optional, air-cooled PowerPlusLife battery
- Sufficient energy for multi-shift operations due to battery capacity of 1,240 Ah and lateral battery replacement
- Air-cooled battery with especially long service life

Precision

- Optimum set-up of drive unit and hydraulic control at maximum handling rate or maximum efficiency
- Speed, acceleration and braking can be individually set
- Sensitive operation and continuous control of lifting speed thanks to the latest proportional valve technology
- Driver's cab set to one side gives optimum view of loads to enable precise load handling
- Intuitive single-pedal control

Ergonomics

- The roomy, comfortable driver's cab can be individually set up
- Hydraulic power steering with small steering wheel, optimally offset to the left
- Narrow, adjustable steering column with no annoying display instruments
- Central display and control unit in the driver's field of vision
- Generous storage space in the right and rear workstation areas
- Consistent operating concept across the whole RX series

- Individually adjustable control concepts (mini-lever, fingertip or joystick)
- Simple and safe entry and exit

Compactness

- Compact forklift sizes and excellent mobility enable working aisle widths of under five metres
- Narrow vehicle frames enable efficient block forklifting

Safety

- Perfect all-round visibility due to higher driver's seat, driver's cab being set to one side, large viewing window in roof and C-pillar at the rear
- Optimum safety levels thanks to the forklift's low centre of gravity and steering axle with high self-aligning bearing
- Electrically heated rear windscreen ensures clear visibility in cold environments
- The forklift's low centre of gravity and a pendulum pivot steering axle ensure optimum visibility
- Outstanding forklift stability when cornering, no electronic assistance required
- Wear-free disc brakes that run in an oil bath

Environmental Responsibility

- Low operating costs due to low energy consumption in all operating cycles and long maintenance intervals
- Blue-Q efficiency model saves up to ten per cent energy at the press of a button with no loss of performance
- Over 95 per cent of all installed materials are recyclable
